

Tactoset supports cell-mediated regeneration of new bone as material is resorbed^{1,2}

Enhanced flowability & injectability

- Contains hyaluronic acid (HA), a naturally occurring substance in the human body
- HA enhances delivery of the calcium phosphate
- Highly flowable and easily injectable through minimally invasive surgery¹
- Provides tactile feedback to confirm filling of the bone defect¹
- Interdigitates into trabecular bone architecture to fill closed bone voids^{1,2}

Closed mixing system

- Minimizes environmental exposure¹
- Enhances ease of use¹

Unique cannula design

- Allows surgeons to easily switch intraoperatively between side and end Tactoset delivery without having to remove and reinsert the outer cannula¹

Tactoset *Injectable Bone Substitute*

TACTOSET MATERIAL SET

1. Pre-filled mixing syringe containing powder
2. Glass syringe containing setting solution
3. Four 1 mL Luer lock syringes
4. Female-female Luer lock connector

ANIKA DELIVERY CANNULAS

1. Drillable outer cannula (with removable drillable stylet)
GAUGE 3.05 mm (11 GA)
LENGTH 110 mm
2. Inner cannula for end delivery
GAUGE 2.41 mm (13 GA)
LENGTH 134.39 mm
3. Inner cannula for side delivery
GAUGE 2.41 mm (13 GA)
LENGTH 134.39 mm
4. Push rod

Anika delivery cannulas provide easier use with mini c-arm

TACTOSET ORDERING INFORMATION

Item Code	Description
1000040	Delivery cannula set including: 1 drillable outer cannula with removable drillable stylet; 1 inner cannula for end delivery; 1 inner cannula for side delivery; 1 push rod
6000041	Tactoset material set including: 1 prefilled mixing syringe containing Tacoset powder; 1 glass syringe containing Tactoset setting solution; 4 Luer lock syringes (1 mL); 1 female-female Luer lock connector

Please note that both item codes are needed for each procedure
